

en Instructions for use

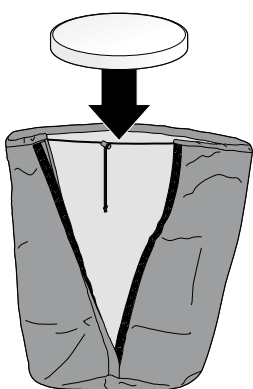

- Continue to water the plant as usual.
- For even better frost protection for the plant, you can also use jute or coconut mulch discs, which are available from specialist retailers. These discs effectively ensure that the soil moisture is stored and thus reduce the risk of the soil freezing.

1.

Open the drawstring and the hook-and-loop fastener.

2.

Insert the insulating base.

3.

Place the plant in the pot on the insulating base.

4.

Close the hook-and-loop fastener carefully and tighten the drawstring with the stopper.
