

LED make-up mirror

en Instructions for use

Safety warnings

Read the safety warnings carefully and only use the product as described in these instructions to avoid accidental injury or damage. Keep these instructions for future reference. If you give this product to another person, remember to also include these instructions.

Intended use

The product is designed for private indoor use and is not suitable for commercial purposes. The built-in LEDs are not suitable for lighting whole rooms.

Danger to children

- Children are not aware of the risks involved in handling electronic devices incorrectly. Therefore, keep the product out of the reach of children.
- Keep the packaging materials out of the reach of children. They pose several risks, including the risk of suffocation!

Danger due to electricity

- Do not make any modifications to the product. Have repairs to the product carried out only by a specialist workshop. Improper repairs can result in considerable danger to the user.
- When charging the battery in the LED make-up mirror, note the following:
 - The LED make-up mirror must not be charged in bathrooms or in other damp rooms. Only charge it in dry, indoor rooms.
 - If the LED make-up mirror gets wet, allow it to dry thoroughly before connecting it to the mains using the USB charging cable.
 - Do not place any containers filled with liquids, such as vases, on or within close proximity of the product. They could topple over and the liquid could impair the electrical safety of the device. There is a risk of an electric shock.

- To charge the rechargeable battery, use only a suitable USB mains adapter that complies with the technical specifications.
- Do not use or attempt to repair faulty chargers.
- Do not connect the LED make-up mirror to the mains power supply if the mirror itself or the USB charging cable shows signs of visible damage.
- Do not cover the LED make-up mirror during charging.

Danger due to fire/burns

- The rechargeable battery is firmly built into the product and cannot and must not be replaced or removed. There is a risk of explosion if the battery is replaced incorrectly. The battery should be replaced only with an identical or equivalent type. If the rechargeable battery is defective, contact a specialist workshop.
- Do not place any naked flames such as burning candles near the product. The product must be kept away from candles and other naked flames at all times to prevent the spread of fire.
- **Warning!** The product contains a lithium-ion rechargeable battery. This battery must not be taken apart, thrown into fire or short-circuited. It must also not be exposed to intense heat or extremely low air pressure. Risk of explosion!
- Do not modify and/or deform/heat/dismantle rechargeable batteries. Do not allow damaged rechargeable batteries to come into contact with water.

Risk of injury

- Place the product in a location where it will not fall down. Risk of injury due to broken glass!

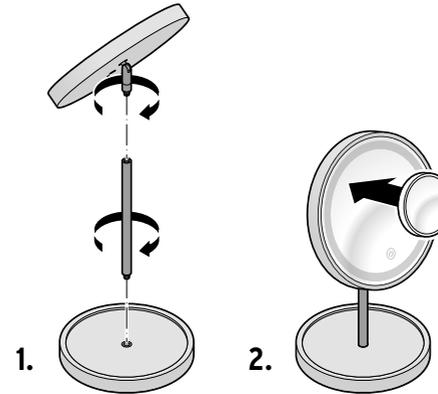

Material damage

- Do not immerse the LED make-up mirror or the USB charging cable in water or other liquids.
- Make sure that no moisture gets into the product through the USB connection socket.
- Lay the USB charging cable in such a way that the LED make-up mirror cannot be accidentally pulled down.
- The USB charging cable must not be kinked or crushed. Keep the USB charging cable away from sharp edges and sources of heat.
- Do not expose the product to any hard impacts and protect it from dust, moisture, direct sunlight and extreme temperatures.
- Do not use caustic or abrasive agents or hard brushes, etc. for cleaning.
- The LEDs are built in and cannot and must not be replaced.
- Some varnishes, synthetic substances and types of furniture polish may react adversely with the material of the non-slip base and soften it. To avoid unwanted marks on furniture, place a non-slip mat underneath the product if necessary.

Technical specifications

Model:	724 765
Rechargeable battery:	lithium-ion 3.7 V 1200 mAh
(tested as per UN 38.3)	Watt-hour rating: 4.44 Wh (non-replaceable)
Input:	5 V 0.5 A (The symbol indicates direct current)
Charging time:	approx. 3 hours
Light duration (with fully charged battery):	approx. 4 hours (100% light intensity)
Light source:	LED
Protection class:	III
Ambient temperature:	+10 to +40 °C

Assembly

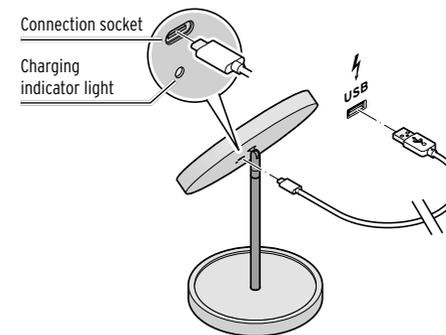

1. Assemble the LED make-up mirror as shown.
2. Attach the close-up mirror to the main mirror surface by pressing it firmly onto any spot using the suction cups.

Charging the battery

The built-in rechargeable battery comes in a half-charged state. This is to prevent it from becoming damaged. So before first use, fully charge the battery by connecting it to the power supply via a mains adapter (not included).

You can switch on the LED lighting during charging, but this will increase the charging time.

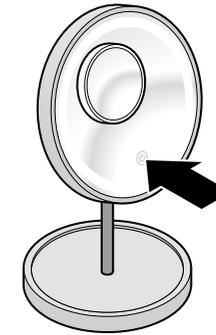

1. Plug one end of the USB charging cable into the socket on the back of the LED make-up mirror.
2. Connect the other end of the USB charging cable to a power socket using a suitable mains adapter.

The charging indicator light lights up red while the battery is charging. The usual charging time for a flat battery is approx. 3 hours. Once the battery is fully charged, the charging indicator light turns green.

3. When the device is charged, remove the mains adapter from the power socket and disconnect the USB charging cable from the make-up mirror.

With a fully charged battery, you can use the mirror's LED lighting for approx. 4 hours. If the LED lighting can no longer be switched on, the battery must first be fully recharged.

Switching the LED lighting on/off and dimming it

1. **To switch on the LED lighting** around the mirror, briefly tap the On/Off switch near the lower edge of the mirror surface once.
2. **To dim the light**, place your finger on the On/Off switch and hold it there. The light intensity is reduced continuously. Briefly remove your finger from the On/Off switch and then put it back on the switch. The light intensity is gradually increased again.
3. **To switch it off**, briefly tap the On/Off switch once again.

When the mirror LED is switched on, it will always shine at maximum light intensity.

Cleaning

- ▷ When necessary, wipe the bamboo parts and metal rod with a soft cloth slightly dampened with water and then wipe with a dry cloth. No moisture must be allowed to enter the USB socket.
- ▷ Carefully clean the surfaces of the mirror using a soft cloth, slightly dampened with clean water (do not use glass cleaner!), and then wipe dry.

Disposal

This product, its packaging and the built-in rechargeable battery have been manufactured from valuable materials that can be recycled. Recycling reduces the amount of refuse and helps to preserve the environment.

Dispose of the **packaging** at a recycling point that sorts materials by type. Make use of the local facilities provided for collecting paper, cardboard and lightweight packaging.

Devices, single-use batteries and rechargeable batteries marked with this symbol must not be disposed of along with household waste! You are legally obliged to dispose of old devices separately from household waste.

Electronic devices contain hazardous substances and, if stored or disposed of improperly, may cause harm to health or the environment. Information about collection points where old devices can be disposed of free of charge is available from your local authorities. Flat single-use and rechargeable batteries must be handed in at a local authority collection point or returned to a battery retailer. Tape off the contacts of lithium single-use/rechargeable batteries prior to disposal.

Warning! This device contains a battery that, for safety reasons, is firmly built into the device. It cannot be removed without destroying the casing. Improper disassembly leads to safety hazards. For this reason, take the device intact to a collection point where the device and battery will be disposed of properly.
